

No. 23/13/2021-R&R (Pt-1)

Government of India

Ministry of Power

Shram Shakti Bhawan, Rafi Marg,
New Delhi, 25th September, 2026

To,

Head,

Generating companies owning the Captive Generating Stations as per list at Annexure

Subject: Directions, under Section 11 of the Electricity Act, 2003, to generating companies owning Captive generating plants – regarding.

Sir,

Considering the prevailing demand–supply scenario and the expected rise in electricity demand in the coming months, the Ministry of Power (MoP) is undertaking various measures to ensure adequate supply of electricity to consumers. To optimise availability of electricity generation, it is imperative that entire capacity of all the sources of generating electricity including the captive generating plants are utilised to the maximum possible. Accordingly, in the larger public interest, to ensure optimal availability of power to the consumers, the following directions are issued under Section 11 of the Electricity Act, 2003:

- (a) Captive coal based generating stations of the installed capacity of 50 MW and above, shall operate and generate power to the maximum extent of their available capacity.
- (b) The generators shall offer their available surplus generation, after meeting their own captive demand, through the power exchanges, in accordance with the applicable market regulations and procedures.
- (c) The generators shall maintain adequate coal stock so as to ensure availability of fuel for operation of the plant and enable maximum generation.
- (d) The generators shall submit a weekly report to the Central Electricity Authority indicating generation, captive consumption and sale of power through the power exchanges/other permitted avenues, along with details of available capacity and coal stock, as may be prescribed.
- (e) The above directions shall be applicable for the period from 1st October, 2026 till 31st December, 2026, taking into account the prevailing power demand-supply position and the requirement for ensuring adequate availability of power in the grid.

2. This issues with the approval of the Competent Authority.

Yours faithfully,

Manish Mishra
25/9/2026
